

Unique Encapsulation Technology (UET) is a technology and knowledge driven liquid/powder capsule manufacturing company. Our team of business development personnel is dedicated to taking your idea from concept to completion with years of experience helping customers answer key questions.

Liquid Encapsulation

We have the capabilities to develop your product into a liquid formula by solubilizing powders in oils or creating liquid suspensions of those powders that typically are difficult to disperse. Our capsules, U-Caps® retain all the advantages of two-piece capsules, but are 100% **vegetarian**. Additionally, our manufacturing process displaces air with nitrogen to avoid oxidation; this together with our unique banding technique creates a capsule with **improved stability** and **reduces leaking in extreme temperatures**.

What U-Caps® can do for you	
Small batch production	✓
Fast turnaround time	✓
Vegetarian	✓
Custom color print available	✓
Nitrogen filling available to extend stability	✓
100% traceability of raw & packaging materials	✓
99.9% leak proof	✓
Oils/essential oil/oil suspensions/difficult-to-formulate actives	✓

Benefits Of U-Caps®

- 100% vegetarian
- Improved bioavailability
- Nitrogen filling available

Features

- Custom color print available
- Modern & unique appearance
- Better stability of appearance and activity
